INTRODUCTION

This handbook is the ninth edition of a book first published in 1970 by the Department of Commerce and Community Affairs for general reference use by those interested in business or industrial planning and investment in areas of the State of Illinois.

Tables in this edition (1989) represent the most recent and suitable data available. Some revisions of historical series (found in earlier editions) have been made because of the availability of improved data, and some new material has been added.

The material in the book is presented in three parts: the first part includes statistical information pertaining to the economy of the entire state. The second part summarizes the data elements of the Component Area and provides maps showing comparative boundaries between Component Areas and Corridors of Opportunity. A map is included which highlights the Component Area and identifies Corridors which are wholly or partially contained therein. The third part presents economic data for each of the twelve Component Areas which are identical to the component areas found in "A Five-Year Plan 1989," published by the Illinois Department of Commerce and Community Affairs.

In the tables shown in the book, details may not add to totals due to rounding. In the columns of the tables, unless otherwise indicated, hyphens represent zero, "NA" indicates data not available or not applicable, and (D) indicates data withheld to avoid disclosure of the operation of individual firms.

STATEWIDE SUMMARY

The Department of Commerce and Community Affairs estimates Gross State Product (GSP) on both a quarterly and an annual basis. The annual estimates presented herein are for recent years through 1988. The method used in making the estimates rests on the development by the U.S. Department of Commerce of estimates of Gross National Product by industry, and the application of comparative U.S. and state nonfarm earnings data published by Commerce, along with farm income data for the state published by the U.S. Department of Agriculture. GSP data are shown first in the statewide section.

In addition to the Gross Product tables, tables showing Total Personal Income for the state are presented. Total personal income is the current income (for the given year) of persons in the state from all sources. It is measured before deductions of income and other personal taxes, but after deduction of personal contributions to Social Security, government retirement, and other social insurance programs. It includes income received from business; federal, state and local governments; households; institutions; and foreign countries. It consists of wages and salaries (in cash and in kind, including tips and bonuses as well as contractual compensations), various types of supplementary earnings termed "other" labor income (the largest item being employer contributions to private unincorporated businesses (farm and nonfarm), including the incomes of independent professionals, net rental income, dividends, interest, and government and business transfer payments (consisting in general of disbursements to persons for which no services are rendered currently, such as unemployment benefits, Social Security payments, and welfare and relief payments).

Following the Gross State Product and Personal Income Tables in the statewide section, data relating to the state's manufacturing sector are presented which are indicative of the pattern of trade in manufacturers, agricultural and mineral production, the transportation network, employment and wages, and population.

COMPONENT AREA AND CORRIDOR SUMMARIES

This section establishes a link between the regional component area structure and the Corridors of Opportunity. Maps are presented which compare the Corridors with Component Areas.

Data summaries for the Component Areas are presented to assist in drawing comparisons and contrasts between Areas and Corridors.

COMPONENT AREA DATA

In addition to the materials relating to general economic trends for each component area, materials are presented relating to the manufacturing, agricultural and mining sectors, transportation, employment and wages, population, retail sales, housing permits, property taxes, education, travel expenditures and banking.

For additional information related to the data presented in this book, contact the Illinois Department of Commerce and Community Affairs, Division of Research and Analysis, 620 East Adams Street, Springfield, Illinois 62701, (217) 782-1438.
